DETAILED ACTION

1. Applicant's election without traverse of group I (1-10, 14-34) in the response filed on 11/14/2003 is acknowledged.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-2, 6, and 8-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Cedrome (US005349137A).

Cedrome's device discloses a communication cable comprising a first optical fiber (figs. 1-6); a first and second intermediate layer (8, 7) surrounding the first optical fiber (6); and a first electrically insulating jacket (3) surrounding the first and second intermediate layers (8, 7); wherein the first intermediate layer includes a first electrical conductor (9), the first layer having a strengthening material (15) and the use of the metal ferrule as nut to hold the fiber.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and

Art Unit: 2839

the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 3-5, 7 rejected under 35 U.S.C. 103(a) as being unpatentable over Cedrome (US005349137A) in view of Gareis (US005557698A) .

Cedrome's device discloses the aforementioned limitations, but fails to disclose the metallic braided conductor and the zipcord or ripcord. Gareis' device discloses the metallic braided conductors (37,38), and the ripcord. It would have been obvious to one having ordinary skill in the art at the time the invention was made to use disclose the metallic braided conductor and the zipcord or ripcord such as the one discloses in Gareis' device in order to improve the interconnection features in Cedrome's device.

Conclusion

4. Claim 10 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. Prior art fails to disclose the nut or the crimping sleeve sliding up over the ferrule for crimping the collection of metal strands to make connection with the rest of the claims limitations.

5. Claims 14-34 are allowed (see paragraph 4).
